

FOLDING PAPER MITERS

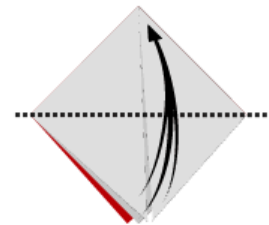

Folding Instructions: red is the right side of the paper; the light side is the wrong side

1. Place paper with the right side up.
Fold the top corner down to the bottom corner.

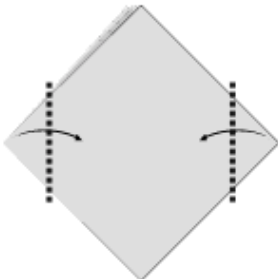

2. Fold the right corner down to the bottom corner.
Repeat with the left corner.

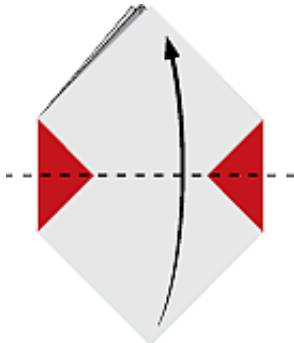

3. Fold the top three lower corners up to the top corner, as shown.
(That leaves one single bottom layer/corner that is not folded up.)

4. Flip the paper over, so the right side is on top.

5. Fold the left corner inward.
Repeat with the right corner.
How much you fold determines the width of the miter; for an 8½ inch square, fold in a little more than an inch

6. Fold the bottom corner (layer) up.
Decorate as desired.

Enjoy!
